

Grace Hill Homeowners Association
Architectural Control Committee

March 13, 2011

Mr. Dale Bredahl
1140 Grace Hill Drive
Roswell, GA 30075

Dear Dale,

Thank you for meeting with the Architectural Committee this afternoon and providing the additional information on your construction plans.

The ACC committee accepts your agreement to cover the support columns with brick or stone. If you decide to use wooden posts in lieu of brick or stone, we will require lattice screening on the outside of the columns on the exposed sides of your addition.

Upon receipt of your Permits from the City of Roswell, please re-submit your request to the ACC providing for one of the above choices. The ACC is willing to work with you upon receipt of your revised Application for Design Review indicating the support column design and materials.

We highly recommend a landscape plan for simple foundation plants on the West side of your addition.

Sincerely,

Jackie Hand
ACC Chairman
